Indicator description

Indicator color	Description
Blue light flashes and quickly goes out	Successfully read the barcode and make a short tone (low frequency)
Red light is charging reminder light	A steady red light indicates charging is in progress, and a red light is off indicating full charge or no wired charging;

Tips ：

Charging prompt: low battery buzzer sounds 5 times and scanner shut down;

Charging status: The red light is always on when charging, and the red light is off when it is full.
